23rd March 2025

Dear HR Manager,

I hope this message finds you well. I am thrilled to apply for the DevOps Engineer position at your esteemed organization, eager to contribute my expertise in CI/CD pipelines, Docker, and web development to support your team's goals.

With a Bachelor's in Information Technology from Informatics College Pokhara (2021–2024), I've built expertise through hands-on roles. As a DevOps Engineer at Informatics College (Feb 2024 – May 2025), I implemented CI/CD pipelines with Jenkins and GitHub Actions to optimize workflows. At Pokhara IT Hub (Jan 2023 – July 2023), I automated build processes and managed Docker environments, enhancing team efficiency.

One of my proudest accomplishments is developing an Automated Deployment System during my time at Informatics College, which reduced manual deployment efforts by 70% through Docker and CI/CD integration. I also created a UI/UX prototype for a web application, blending my skills in frontend development and design to craft accessible and responsive user experiences. These projects have deepened my passion for leveraging technology to solve real-world challenges.

With proficiency in Docker, CI/CD pipelines, frontend development, and UI/UX design—complemented by strong communication and leadership abilities. I thrive in dynamic environments where I can learn, innovate, and deliver impactful solutions. I'm excited to bring this enthusiasm and skill set to your team, contributing to innovative projects while growing professionally.

I would be delighted to discuss how my background and dedication can align with your company's vision. Please feel free to contact me at your convenience—I'd love to connect!

Looking forward to hearing from you.
