Dear Mr. Parajuli,

I am excited to apply for the UI/UX Designer position at Informatics Company. With a strong background in graphic design and a passion for creating seamless, user-centered digital experiences, I am confident that my skills will be a valuable addition to your team.

I am currently a Year 2 student at Informatics College pursuing my Bachelor's in IT, where I have developed proficiency in design tools such as Figma, Adobe Photoshop, and Corel Painter. I am also well-versed in UI/UX design principles, including user research, wireframing, prototyping and usability testing. Throughout my academic journey, I have worked on various design projects, collaborating with peers to create user-friendly interfaces and engaging designs that meet aesthetic and functional goals.

Additionally, my previous experience as a graphic designer has given me a keen eye for detail and a strong understanding of design systems. I am always eager to stay updated with the latest trends in UI/UX design and am enthusiastic about the opportunity to contribute to the Informatics Company's success.

I would be thrilled to further discuss how my skills align with your needs and how I can contribute to your team. Thank you for considering my application. I look forward to

the possibility of working with you. Please feel free to contact me at +977 9841033414 or [nehishahirachan@gmail.com](mailto:nehishahirachan@gmail.com).

Sincerely,  
Nehisha Hirachan
