Education

Informatics College Pokhara	Expected Jan 2022
BSc (Hons) in Computing	*Pokhara, Nepal*

- **Relevant Coursework:** Web Development, Software Design, Database Management, Object-Oriented Programming, Algorithms and Data Structures

Experience

Freelance Web Developer	Jan 2023 – Present
Self-Employed	*Pokhara, Nepal*

- Developed multiple web applications using technologies such as JavaScript, HTML, CSS, and MySQL to gain practical experience and deepen understanding of web development concepts.
- Implemented responsive design principles to ensure seamless user experience across various devices, improving accessibility and user engagement.
- Collaborated with clients to understand their requirements and deliver tailored solutions, demonstrating effective communication and client management skills.
- Continuously learning and exploring new technologies through online courses and self-directed projects to stay updated with industry trends and best practices.

Projects

Music Application | *Android, Java*

- Developed a music application for Android using Java, featuring a sleek user interface and seamless audio playback.
- Implemented features such as playlist management, audio controls, and offline playback capability, enhancing user experience.
- Utilized Android APIs for audio playback and storage to ensure compatibility across various devices and versions.

Calculator App | *Android, Java*

- Designed and developed a calculator application for Android using Java, providing users with basic arithmetic operations and scientific functions.
- Implemented a clean and intuitive user interface with responsive buttons and input fields for seamless calculation experience.
- Ensured accuracy and efficiency in mathematical calculations through robust algorithm implementation and error handling.

Web Projects

- Developed and deployed multiple static websites and portfolio showcases using HTML, CSS, and JavaScript.
- Focused on building solid foundations in frontend development, including responsive design and user experience principles.
- Currently exploring technologies such as React.js, Next.js, Express.js, and MongoDB to advance web development skills.

Technical Skills

Languages: JavaScript, Java, Python
Web Dev: JavaScript, HTML, CSS

Backend Dev: Java, Python
Database: MySQL

Problem-Solving: Troubleshooting, OOP
Soft Skills: Communication, Teamwork, Time Mgmt, Adaptability **Critical Thinking, Attention to Detail, Leadership**

Achievements

- Actively pursuing Bachelor's degree in Computer Science with a focus on honing technical skills and knowledge.

- Engaging in ongoing self-learning and personal projects to enhance expertise in software development.

- Demonstrating dedication and commitment to academic pursuits and professional growth.

Social Engagements

Social Media: Connect with me:
