Dear Hiring Manager,

I am writing to apply for the Data Analyst position at Spotify. With a solid foundation in Python, SQL, and data visualization, along with hands-on experience analyzing user behavior and contributing to open-source projects, I am eager to bring my skills to a company that values data-driven decision-making. At Kaggle Analytics, I worked on optimizing recommendation systems and collaborated with diverse teams to turn complex datasets into actionable insights.

What excites me most about Spotify is its commitment to personalization and innovation. I'm inspired by how your platform uses data to enhance the listening experience for millions globally, and I'm enthusiastic about the opportunity to contribute to that mission. I would love the chance to bring my passion for analytics and problem-solving to your team.

Sincerely,
 Mamata Bhattarai
