EXPERIENCE

DevOps Engineer
Informatics College Pokhara

📅 Feb 3, 2024 – May 2025   📍 Hospital Chowk, Pokhara

- Designed and implemented CI/CD pipelines using tools like Jenkins and GitHub Actions to streamline development workflows and reduce deployment times.
- Managed Docker containers for application deployment, ensuring scalability and consistency across development and production environments.
- Collaborated with development teams to integrate automated testing into the deployment process, improving software quality.

Junior DevOps Engineer
Pokhara IT Hub

📅 Jan 4, 2023 – July 4, 2023   📍 Pokhara, Nepal

- Assisted in setting up development environments using Docker and virtualization tools to support team projects.
- Contributed to the automation of build and release processes, enhancing deployment efficiency.
- Provided technical support for version control systems like Git, ensuring smooth collaboration among team members.

PROJECTS

Automated Deployment System
Informatics College Pokhara

📅 Feb 2024 – May 2024

- Developed a system to automate software deployments using Docker and CI/CD pipelines, reducing manual intervention by 70%.
- Integrated monitoring tools to track system performance and uptime.

UI/UX Prototype
Personal Project

📅 Jan 2024 – Mar 2024

- Designed a user-friendly interface prototype for a web application, focusing on accessibility and responsive design principles.

MY LIFE PHILOSOPHY

"The only way to deal with an unfree world is to become so absolutely free that your very existence is an act of rebellion."

STRENGTHS

Communication   Leadership   Frontend Development   UI/UX Design   Docker   CI/CD Pipelines
