Dear HR Manager,

I hope you're doing well. I'm excited to apply for the Web Developer position and would love the opportunity to bring my passion for designing and building user-friendly websites to your team.

Currently pursuing my BSc (Hons) Computing in Informatics College Pokhara, I've had the chance to work on projects that have strengthened my skills in web development, software engineering, and cloud computing. One of my most rewarding projects was developing an IoT Smart Home Automation System, which helped me understand how technology can enhance security and convenience in everyday life. I also built a fully functional e-commerce website, where I handled everything from user authentication to product listing and order management, an experience that deepened my knowledge of real-world web applications.

I enjoy solving problems, learning new technologies, and bringing creative ideas to life through code. My skills in web design, Python, Java, and database management allow me to develop both visually appealing and functional websites. More than just writing code, I love the process of crafting seamless and engaging user experiences.

I'm eager to start my professional journey and contribute to a team that values innovation and growth. I'd love the chance to discuss how my skills and enthusiasm can add value to your company. Please feel free to reach out, I'd be happy to connect!

Looking forward to hearing from you.

Respectfully Yours,

monika.
