Dear Mr. Parajuli,

I am excited to apply for the UI/UX Designer position at Informatics Company. With a strong background in graphic design and a passion for creating seamless, user centered digital experiences, I am confident that my skills will be valuable addition to your team.

I am a second-year Bachelor's in IT student at Informatics College, where I have built strong skills in design tools like Figma, Adobe Photoshop, and Corel Painter. I have a solid understanding of UI/UX design principles, including user research, wireframing, prototyping, and usability testing.

During my studies, I have participated in multiple design projects, working closely with my peers to create intuitive interfaces and visually appealing designs that balance both functionality and aesthetics. My previous role as a graphic designer has sharpened my attention to detail and deepened my knowledge of design systems.

Passionate about keeping up with the latest UI/UX trends, I am excited about the chance to contribute to the success of Informatics Company.

I would be thrilled to further discuss how my skills align with your needs and how I can contribute to your team. Thank you for considering my application. I look forward to

the possibility of working with you. Please feel free to contact me at +977 9745451268 or bitttishaadhikari@gmail.com.

Sincerely,

Binita Adhikari
