Mr. Smith
XYZ Company
Chipledhunga, Pokhara

Dear HR Manager,

I am excited to apply for the Full-Stack Developer position at XYZ company. As a BSc (Hons) Computing student at Informatics College Pokhara, I have honed my skills in front-end (HTML, CSS, JavaScript) and back-end (Java, Spring Boot, Python) development.

My academic projects showcase my ability to develop real-world applications. For instance, my IoT-based Smart Water Tank system demonstrated my ability to integrate hardware and software for automated water management. Additionally, I developed a fully functional e-commerce website, incorporating user authentication, product management, and order processing. These experiences have sharpened my analytical thinking, debugging skills, and ability to collaborate within a team.

 I am particularly excited about XYZ company because it provides a great environment for Full-Stack Developers to learn, grow, and work on innovative projects. I admire how the company uses modern technologies to build scalable and user-friendly applications, and I would love to be part of a team that creates impactful digital solutions. I am eager to apply my skills and grow while contributing to your projects.

I would appreciate the chance to discuss how my skills and experiences can contribute to your company's needs. I am available for an interview at your convenience and look forward to your response.

Best regards
Karuna Thapa
